U.O. No.361/Books dated 4th September 1923

The demand for each month for power supplied
to Mining Companies averages about £ 15,000/-. But
the whole amount is not paid in always regularly
by all Companies as some Companies take full advan-
tage of the period of time allowed for payment i.e
one month after receipt of demand in London. This
makes the collections very fluctuating the number
of months and the Companies the dues of which are
collected
/being small in some months and large in others.
In July payment has been received from only four
Companies.

and the expectation has been realised so far except in May 1923 and July 1923.

The shortage of 1.25 referred to above by the Assistant Secretary is both under "Realisations in India" and ^{under} "Realisations by Messrs. Coutts and Co." The fall from the Budget average under the latter is due to arrears still to be realised under circumstances already explained. Under realisations in India, the total revenue that should have been received to realise the Budget is 3.93 whereas only 3.48 has been realised to end of September 1923.

We may watch the progress of revenue for the next three months to see if the deficiency is made up.
